

ToL's E-Learning Development Services

What is E-learning?

Electronic, computer-enhanced learning that is a collaboration of technology and education with the key advantages of:

- ✓ Just-in time flexibility and convenience
- ✓ Broad accessibility
- ✓ Self-direction

How Can E-learning Support Your Business Goals?

Organizations today are using e-learning for a variety of purposes. Through ToL's e-learning design and development process, we ensure the solution directly links to business objectives. Specifically, ToL has partnered with our clients to develop e-learning solutions to:

- ⇒ Efficiently onboard new hire personnel
- ⇒ Provide timely new product training
- ⇒ Enhance existing job related knowledge and skills
- ⇒ Comply with regulatory requirements
- ⇒ Launch new tools and technology

Why Partner with ToL for Your E-Learning Needs?

Our focus throughout the development process is the:

- ⇒ Effective use of subject matter expert's time
- ⇒ Efficient needs analysis and data collection
- ⇒ Streamlined design & development through use of rapid development tools
- ⇒ A quality based solution that creates a valuable learning experience based on clear performance objectives

Investment

Since 1996, we have been delivering valuable cost effective solutions to our clients that meet their learning needs. Our virtual structure, efficiency in the development process and depth of experience allow us to provide competitive e-learning development solutions that meet the needs of our clients.
